

**App.R** – main file to run the R shiny app

**FEGS\_Doc\_Reader\_Shiny\_App\_20230703.R** - Defines the R Shiny App User Interface

**FEGS\_Doc\_Reader\_Functions\_v20230623.R** - functions to read and clean pdf text, search for keywords, and create graphs and figures

**\_targets.R** – used to read the documents simultaneously to speed up processing

**FEGS\_Doc\_Reader\_Functions\_Targets\_v20240214.R** – duplicate of functions to search pdf text, needed to be called by targets function to read and search documents simultaneously

**Synonym\_List\_NESCS\_plustaxa.csv** – Editable input file. Identifies the keyword terms that define each class/subclass based on include, near, and exclude words; if edited, must be re-saved as .rda file using function “create\_synonym\_lists”

**Friendly\_Names\_20240708.csv** - Class/subclass hierarchy, used to define hierarchy and naming convention for bar charts and pie charts
